Ray:

Attached are the results of a literature and patent search on your invention IL-10560 (Building Airspace Protection System).

It was not required by the ROI review group, but in view of the fact that the first search (which identified US 4,140,005 and WO 98/58743 as prior art references) was performed in [REDACTED], I thought it best to focus this search on BW-related aspects.

Please summarize the relevance of these search results to your invention and send your replies to Alan Thompson (thompson52@llnl.gov) or to me.

Thank you.

Amal
